☐ Urgent☐ Return Receipt

Dear sir,

I do agree with this taxreform. But I would like to sugest for the price tag in the future.

I think the retail price include tax is better than retail price is retail price, we need to add the tax when we pay, this is no good. I mean like Japan, France or England, we do not have to calculate. But in America or in Canada, we need to pay more than the price. when ever I pay, I find the price is so much more than what I expect, actually, just let me know how much I should pay before I make my decision. I feel like shopping in europe instead of America because I feel the price is what I expect to pay even thought the price is cheaper in America but make people feel like more expensive.

Secondly, I earn 360,000 a year, by myself, no allowance at all, if so, in the future, any benifit for me?
