Subject: My view on tax reform etc.

My view is, that if we had a proper functioning democracy where each citizen had an equal say in electing their representatives then the resulting government with the mandate of the people would not have to keep asking us for our views and wasting time and money on fake consultations which only result in this administration doing what it wanted to do in the first place.

Sort out the system and then get on with the job without consulting us on every initiative.

Jill Taylor
