Mr. Secretary,

I am now 63, retired two years ago, I have always been a staunch supporter of SAR government despite the eruption of global economic crisis and the SARS case since 1997. This is my first mail ever written to raise my concern over the government policy which I am not concerned of when I was still working, You may be too busy to tackle every letter coming to your hand, yet I hope you could spare some time on my letter to know more about those in need but they are not entitled for the dole nor reach out for public assistance from concerned government department.

I am here not to voice my opposition against your scheme but more interest in the way how you are going to benefit those retired who are relying on the pittance of provident fund accumulated through the years of their service in order to ensure that the livelihood of their twilight years are NOT AFFECTED.

I am looking forward to hear from you soon. Thank you.
