Subject: Sales Tax

I am against sales tax in Hong Kong. Until the government showed that their officials have the ability to invest to the long-term benefits of Hong Kong people and use money wisely to create local opportunities, I do not think sales tax is appropriate. Looked at what we have done after 1997 in Hong Kong.....I cannot cite much. Foreign investment, birth rate, job market...the gap between the rich and the poor.....education system.....on and on

Please pass my vote against sales tax to the relevant department for records.

thanks
