 Urgent Return Receipt

I don't really think this is the good and the best time to introduce the GST to the public. As a small number of people said HK is getting better the job market. I and most of other citizen do not think it is. The job market is not really good at all, as I see in all of the job market newspaper most of the space filled up with Insurance company many of them have an very nice title too.

By introduce the GST you will only make the situation worst as all the teenager will not be able to spend more every week and dinnering with family will also be cutting down too.

As also HK known as a shopping place, this will be cutting down shopping in HK for forginer as interview from TV a forginer spoken out about this GST issue will be thinking about coming to HK again, because of the way of refunding tax take time.

I think the best way to generate a funding for the gov will be a nice big casino in the heart of HK that will be sure of a nice and good funding source for the gov.
