Urgent

Return Receipt

Dear Sir and Madam,

I strongly object the GST. The economy of Hong Kong is just recovering from the depression and also the inflation. Besides, the interest rate increases greatly that makes the housing expense higher and higher. As we all know that, the main industry in Hong Kong is the tertiary. If the government applies this GST at Hong Kong, the purchasing interest of local and tourist will drop obviously. The GST will affect the whole retail industry in depth even for the basic necessities like water and gas. This influence is throughout all the Hong Kong people everyday. With a gain in the revenue, it is not necessary to put this annoying GST for everyone in Hong Kong. It is harmful for the recovering economy of Hong Kong. I hope this GST will be given up. Thank you for your attention!
