Subject: Agree with implementing GST in HK

Dear Sir / Mdm,

Personally, I agree with implementing GST in HK, it is matter of how many percentage.

I think everyone know and understand why our HK government need to have GST and the negative effect. Actually government can think of the percentage between 3%-5%, can start with 3%. I don't think it will be a big impact to HK, but some areas of items, like milk, egg, rice, bread (cheap one) should be excluded as they are necessary items to everyone. I believe HK government have researched and taken many countries as references, they have ideas already.

In short, I suggest HK government thinks of:

1. The percentage of GST
2. Items be covered

Thank you very much

Best Regards,  
Edmund
