Subject: Comment on GST

I agree that the tax base is narrow. From my point of view, GST is not the first choice since there is another problem serious than whether GST to introduce. HK's pollution is serious in many year, if this problem is contiously, our next generation will affect. We can improve our tax base, improve our economic, improve our position in the world etc., but we cannot save our life, it is bad news.

Therefore, we should first solve the pollution problem, much bad air, many litter.....we should introduce the plastic bag tax and increase the penalty for car pollution.

On the other hand, i know that there are around 200 new cars on the road each days.....so unluckily, HK is so small. The air pollution for car is the major reason, we can increase the tax on new car or something like that to control the car issuing.

In my opinion, i have no comment on whether to introduce GIST or not, but, we have another Problem face to us.....
