Urgent

Return Receipt

It is not fair for us to pay tax if we buy a product or a service.
The GST will damage the intention of consumers to spend more money. It will prompt the consumers to spend less money.

Therefore, there will be less spending when GST is enforced and the expected income from this new tax might be much less than forecasted.

This tax should never be introduced in HK as its success depends on free market and low and simple taxes. GST kills them all.
