☐ Urgent

☐ Return Receipt

I strongly disagree with the implementation of GST.
being a low-income class citizen, I cannot afford the extra cost on
commodities
i try hard to earn my living without assistance from the gov't and i pay
tax
annually (even not much)
why should the govt put extra pressure on me?
and i highly suggest to have a fair allocation of resources.
some people's integrated allowance is higher than working class's income
it is very unfair as the assisted people dont contribute to the society
but
get all-round help and care
Please consider thoroughly. dont ruin the fame of hk!
