Subject: Tax reform will destroy Hong Kong

Dear Donald,

I know you are forced to do this mission impossible (hope it really cannot succeed).

A harmony society needs to be easy to live and freedom to choice (to work harder or lazy).

Hong Kong is getting harder to live as CPI is getting up but the average wages cannot catching up and seems resist to go up.

We hope to change from industrial society to financial or travel service.

However, our dense population is not match this kind of society.

GST is good for travel service society to get more money from the business to let the citizen live easier.

Since HK is not this kindly of society so the GST is also not good for us.

On the other hand, Hong Kong have the HUGE reserve saved from all the HONG KONG people. It just like the MPF for HONG KONG.

If we can make the wise use of it, it should be able to make our life easier.

By the way, I think our government is too generous to its worker.

If people always say multi-level marketing is too good to be true, I can say worker in the government is just working on multi-level marketing business.

You are still earning after you are not working at all. Your pay back is not depend on your work out. It may not be 100% right but should be 90% reach the truth.

A good example is that the "Medical Management Council" was planed to charge fee for new born baby hospital living.

The saying was we can increase the income for a million. This kind of increase can be easily achieved by jusing a slight cut down on their bonus of not doing.

Its just a international joke!

I don't want to see the GST will become the other joke and push Hong Kong to the edge of the stability.

All in all, GST is not for HONG KONG.

Hope your can treat it very very carefully and not to set it up.

Thank you for your attention.

Yours sincerely,

Cubic
