Urgent
 Return Receipt

Dear Sir,

The Poor earns \$5000-\$6000 each month. If they spends \$4000 on goods and services. \$200 Tax would be charged. Their life quality would be much more poor.

The middle class earns \$20000-\$30000 each month. They spend \$12000-\$15000 for their private section, rent and rate, management fee. They spend \$15000 on goods and services. \$750 Tax would be charged. Their life quality would be reduced. The middle class are not accepted for most benefits in HK such as housing. The middle class have to pay the tax for themselves, the poor, the HK Government, the new citizens from China. The Salary Tax are not confirmed to be reduced. It puts the great pressure on the middle class.

The rich earns \$1000000 each months. The services and goods tax would not cause pressure on them.

'The rich would become more rich, the poor would become more poor.'

The Govt should ask the rich to pay more tax, the middle class and the poor pay less tax.
