Subject: GST

Dear Sir/ Madam

I am strongly objecting to implement the goods and services tax, as this will badly influence the economy growth in Hong Kong. Such propose would encourage people to avoid shopping and have leisure in Hong Kong; and more likely, their interest in shopping and leisure will shift onto Shenzhen, and boarder line of China.

To broaden the tax income to the government; the following tasks could take into concern:

- Increase the departure tax. Civilians should pay a tax/ fee when leaving Hong Kong. In a sense to keeping the population to spend in Hong Kong.
- Legalized the prostitution industry. Similar propose to the Amsterdam's. Advantages: health standard will be controlled; less criminal and prison issues etc.

Kind attention

Janet Yung
