Dear Sir,

I would agree to the proposed tax reform given folloiwng:

- the cut of salary tax should be structured as low class - same rate as GST, middle class - 2 or 3 % more than GST, high class rank - slide down the scale to at least 3% less that GST.

I under the one of the objective of GST is to enable HKSAR to broaden their tax stream. The GST will be offset by reduction in salary tax. However, if there is an across the board cut in Salary Tax, the high class rank will definitely get the best cream as the cut in Salary tax will definitely benefit more compare with how much they will paid on GST.

Middle class have been suffering a lot and being the bigget punch of people paying Income tax already. They should be getting more cut.

Thank you.

Jackson Kwana
