Subject: GST - I support it

Dear Mr. Henry Tang,

I totally agree with what you said through media! You should stay firm on what you believe!

If Government still rely heavily on her income on small portion of HK citizen, the Government's income would be extremely unstable, especially facing economy downturn.

So many people out there emphasis that GST system is unfair for those who currently need not to pay tax, however, the current system is also considered unfair by those small group of HK citizen who are paying tax....., why all the Government's expenditure should be responsible by these samll group of tax payers and the majority of HK citizen need not to pay but, at the same time, they enjoy much benefit given by the Government? Is it also a fair and health system, I totally disagree!

Change is never easy, people not easily to accept change... but honestly....HK needs a change on it Tax system!

By introducing GST, the responsibility can be more evenly loaded on every HK citizen, also, since HK is a famous place for Mainlanders who loves to buy things and use services in HK, it implies that the HK Government's income not only relies on HK citizen but also involves all the visitors.

We just take a look on Macau as an example, the Macau Government's income is quite stable and has an upward trend because of the influx of visitors spending there, government obtain enormous tax from Gambling business (which you may try to imagine it is a GST in Macau). You can review or interview some of the Macau citizen who will tell you that the fanacial condition of Macau Government is pretty good and therefore Macau citizen enjoy a lot of benefit given by the Government!

If Government facing fanacial difficulty, she can do nothing for her people!

So, Mr. Henry Tang, GST is the utmost important task to complete to ensure a healthy & stable Government's income!

Kindest regards,

Kent Loy

One of the HK citizen
