Urgent

Return Receipt

I absolutely reject this proposal, coz it develops another platform for the government to increase the tax rate.

I didn't see any ways which the "middle class" can benefit from this reform. We will only give more tax if we consume more or buy higher quality products. At the end, it just squeezes us "living" like the low wage class; however, we are poorer than the low wage class coz there is no measures to less our tax burden at all (Unless you cancel the income tax completely!!!)

It is also a dilemma. While everybody should contribute and pay tax, however, the low wage class will be given back the subsidies. What's the point?? It is unfair.
