Subject: Tax Reform

Dear Sir,

I object to the GST plan because there will be a difficulties in collecting the tax from the small/mobile shop. They charged us the tax and did not returned to the government. This is not a fair system to the lower class of people.

More GST only drive the people shop across the border and eventually harm to our own economy.

I also support the idea to have alternate tax foundation by collecting tax from the user who pollute the environment most, such as pay more tax if they use more electricity, pay more tax to the car owner if they have more ticket being fined, that is proportion to their driving behaviour. (Bad driving habit cause tax payer's money to repair the road structure and more hospital service for the road accident victim)
