Dear Sir,

In HK, citizens can be classified as the Poor, the Middle and the Rich.

If the Poor do not submit tax to HK Government, HK Tax income would not be affected. The Tax income from the Poor is small.

If the Rich do not submit tax to HK Government, HK Tax income would still not be affected. The Tax income from the Rich is also small.

If the Middle do not submit tax to HK Government, HK Tax income would be zero. This is because the HK Tax income is seriously depended on the Middle Class.

Methods and solutions should be made to increase the Tax income ratio from the Poor and the Rich.

Even under the new suggested sales Tax, it is still the same. The Poor would be spent less to buy things. Their life would be more poor. The Middle still support the large portion of the HK Tax. The Rich would not give a significant improvement to HK Tax.

No improvement in the Tax Ratio Struction. The poor becomes more poor, the Rich becomes more rich.

MK Au
