Subject: Besides GST

Dear CEO - Mr Tsang,

Beside GST several things you need to concern

1. as RMB is close to Hong Kong Dollars, RMB will be just like hong kong dollars, and the money flow will be increase dramatically, which will boom our economy and lead to inflation, which means mainland government 's monetary policy directly affect hk local economy, which need to be concern

2. US Dollar From past several years is towards weak dollars policy, which is stupid for us to hold so much US dollar, as RMB is strong, we should hold more RMB.

3. And the money issue mechanism base on us dollar is totally out of date, we should issuse base on strong currency such as RMB, but serious problem occur if huge US dollar is sell in the market, chain recation will occur, but the trend is most oil producing countries towards using Euro. the us dollar issue mechanism need to be reviewed, as RMB towards free float

Many thanks in advance

From Vincent
