Subject: broaden tax base

Dear people,

As a tax payer in HK, I make the following suggestions to broaden the tax base, in this order:

1. Institute a property tax. This is done in the states, and it is very effective. Typically most of this money is used for schools.
2. Institute a tax on dividends and interest.
3. If enough revenue has not been generated by these first two taxes, then bring in the sales tax, especially on luxury goods.

Thank you.

Paul Jeffrey Brice
