Subject: Wise people should support the GST

Dear Sir,

I am writing to support the GST proposal.

I think anyone who are looking at the HK economy and society in the long run (and also future generations) should also support it even though there are obstacles to overcome.

I will not vote for those LegCo members who are opposing the GST proposal as I think they just want to keep their voters in the future elections rather than doing good for HK in the long run.

Moreover, as a taxpayer, I may quit working and ask for government assistance because I see the burden of taxpayers is growing bigger and bigger (especially the population of elderly citizens is expanding), it is simply unworthy to work so hard to feed those who are idle at home or non-taxpayers.

Regards,
