Subject: Comments on GST

Being the sandwich level civilian, I have been contributing more than \$130,000 in last several years and particular this year, I would be paying over \$150,000. I find difficulty to understand the benefit on me and my family if the HKSAR Gov't launch this GST. Unless the Gov't show me WHERE IS MY BENEFIT? Why am I going to subsidize the poor people coming from mainland China with no skills or what so ever BUT just collect money from the Gov't without paying any tax? Have some convince me!
