☐ Urgent

☐ Return Receipt

To whom it may concern,

I am a civil servant and the following ideas are my own opinions towards 2007-08 budget.

~ hope that there will be an increase in the salary of the civil servant. My salary right now is as same as what I have got in 1997. It is impossible to believe there is no increase in salary. The government always ask us to buy more things in Hong Kong but how can we do this if we do not have any money?

~ no goods and services tax

~ reduce the income tax - the middle class in HK is indeed the poorest. We have no right to live in the public housing so we need to pay high rent. We cannot enjoy the social welfare of the society so hope that the government can reduce our burden.

~ to increase the income, the government can increase the profit tax and duty on Alcoholic Beverages.

Thank you for your kind attention!

Regards,
