Subject: a small suggestion

Should we take the opportunity to find out how Hong Kong should be ruled:-

In what areas: how the election should be conducted;

how to set up a channel to allow ordinary people to partake.

The ultimate goal is 全民普選.

The key word is gradually "say" to elect the election group of 800 people first.

Those who wanted to be the CEO of HKSAR may join the election group first, to mingle and get sufficient (100) votes to become the CEO candidate.

Other policies would to be considered

Immigration policy – benefits stay for 3 years before enjoying any usual benefits

set up a system to block those in comers with babies in their womb making sure they pay at least half of money deposit money to pay the required hospital bills.

These comers will be issued a receipt and they have to show the hospital the receipt

before admitted to the hospital.

Retirement age and Policy

– set up a central provident paid by employer only

– one should have the right to retire any time after 50 years old and must retire after 60.

Health and hospital fees restructure – must be affordable.

Education benefits – education is the basic right of a general citizen any benifets

should be

non-discriminative.

Tax Reform – no GST; rather progressive tax rate to take more from those who made more money,

on basis of redistribution of wealth - the tax's principle.

Regards

Tsang Chiu Tak

a man with no jobs for over 3 years and have paid more than his fair share of tax money
