☐ Urgent

☐ Return Receipt

I don't mind to pay GST because it is the responsibility and fare to every citizen. However, I don't know why it seems benefit to the middle income instead of lower income households. As in Canada, the gov't will return certain amount of GST to the lower income households after their income reports.

I think the daily necessities should have lower % of GST and the luxury goods should be imposed higher GST amount. What I concern is that the poor would not become poorer and the rich would not be richer.
