Urgent

Return Receipt

Dear Sir/Madam,

What we want is a wise government with leading ability. If the government is just the same as ordinary people, she should not govern us. Officers should have a better mentality than us. Most people will object to whatever form of increase in tax, then where should we get the money from. I think many surrounding countries must be laughing at us, especially Macau. They can develop so well without much support from mainland China. We receive full support, but our own officers cannot do things wisely and properly. Do you want to rely on ordinary citizen's wish to develop HK? Most of us are just F5 graduate. Why do you listen to us. If you cannot think of anything better than our ideas, you just deserve HK\$6000/month as other people. Do something wise for us. Listening to us will temporarily buy some vote tickets for you, but finally if you fail to do something good for us, you will lose all the vote tickets.

Be a wise government and officer.
